BO STJERNE THOMSEN – ARKITEKTUR & DESIGN - 2006

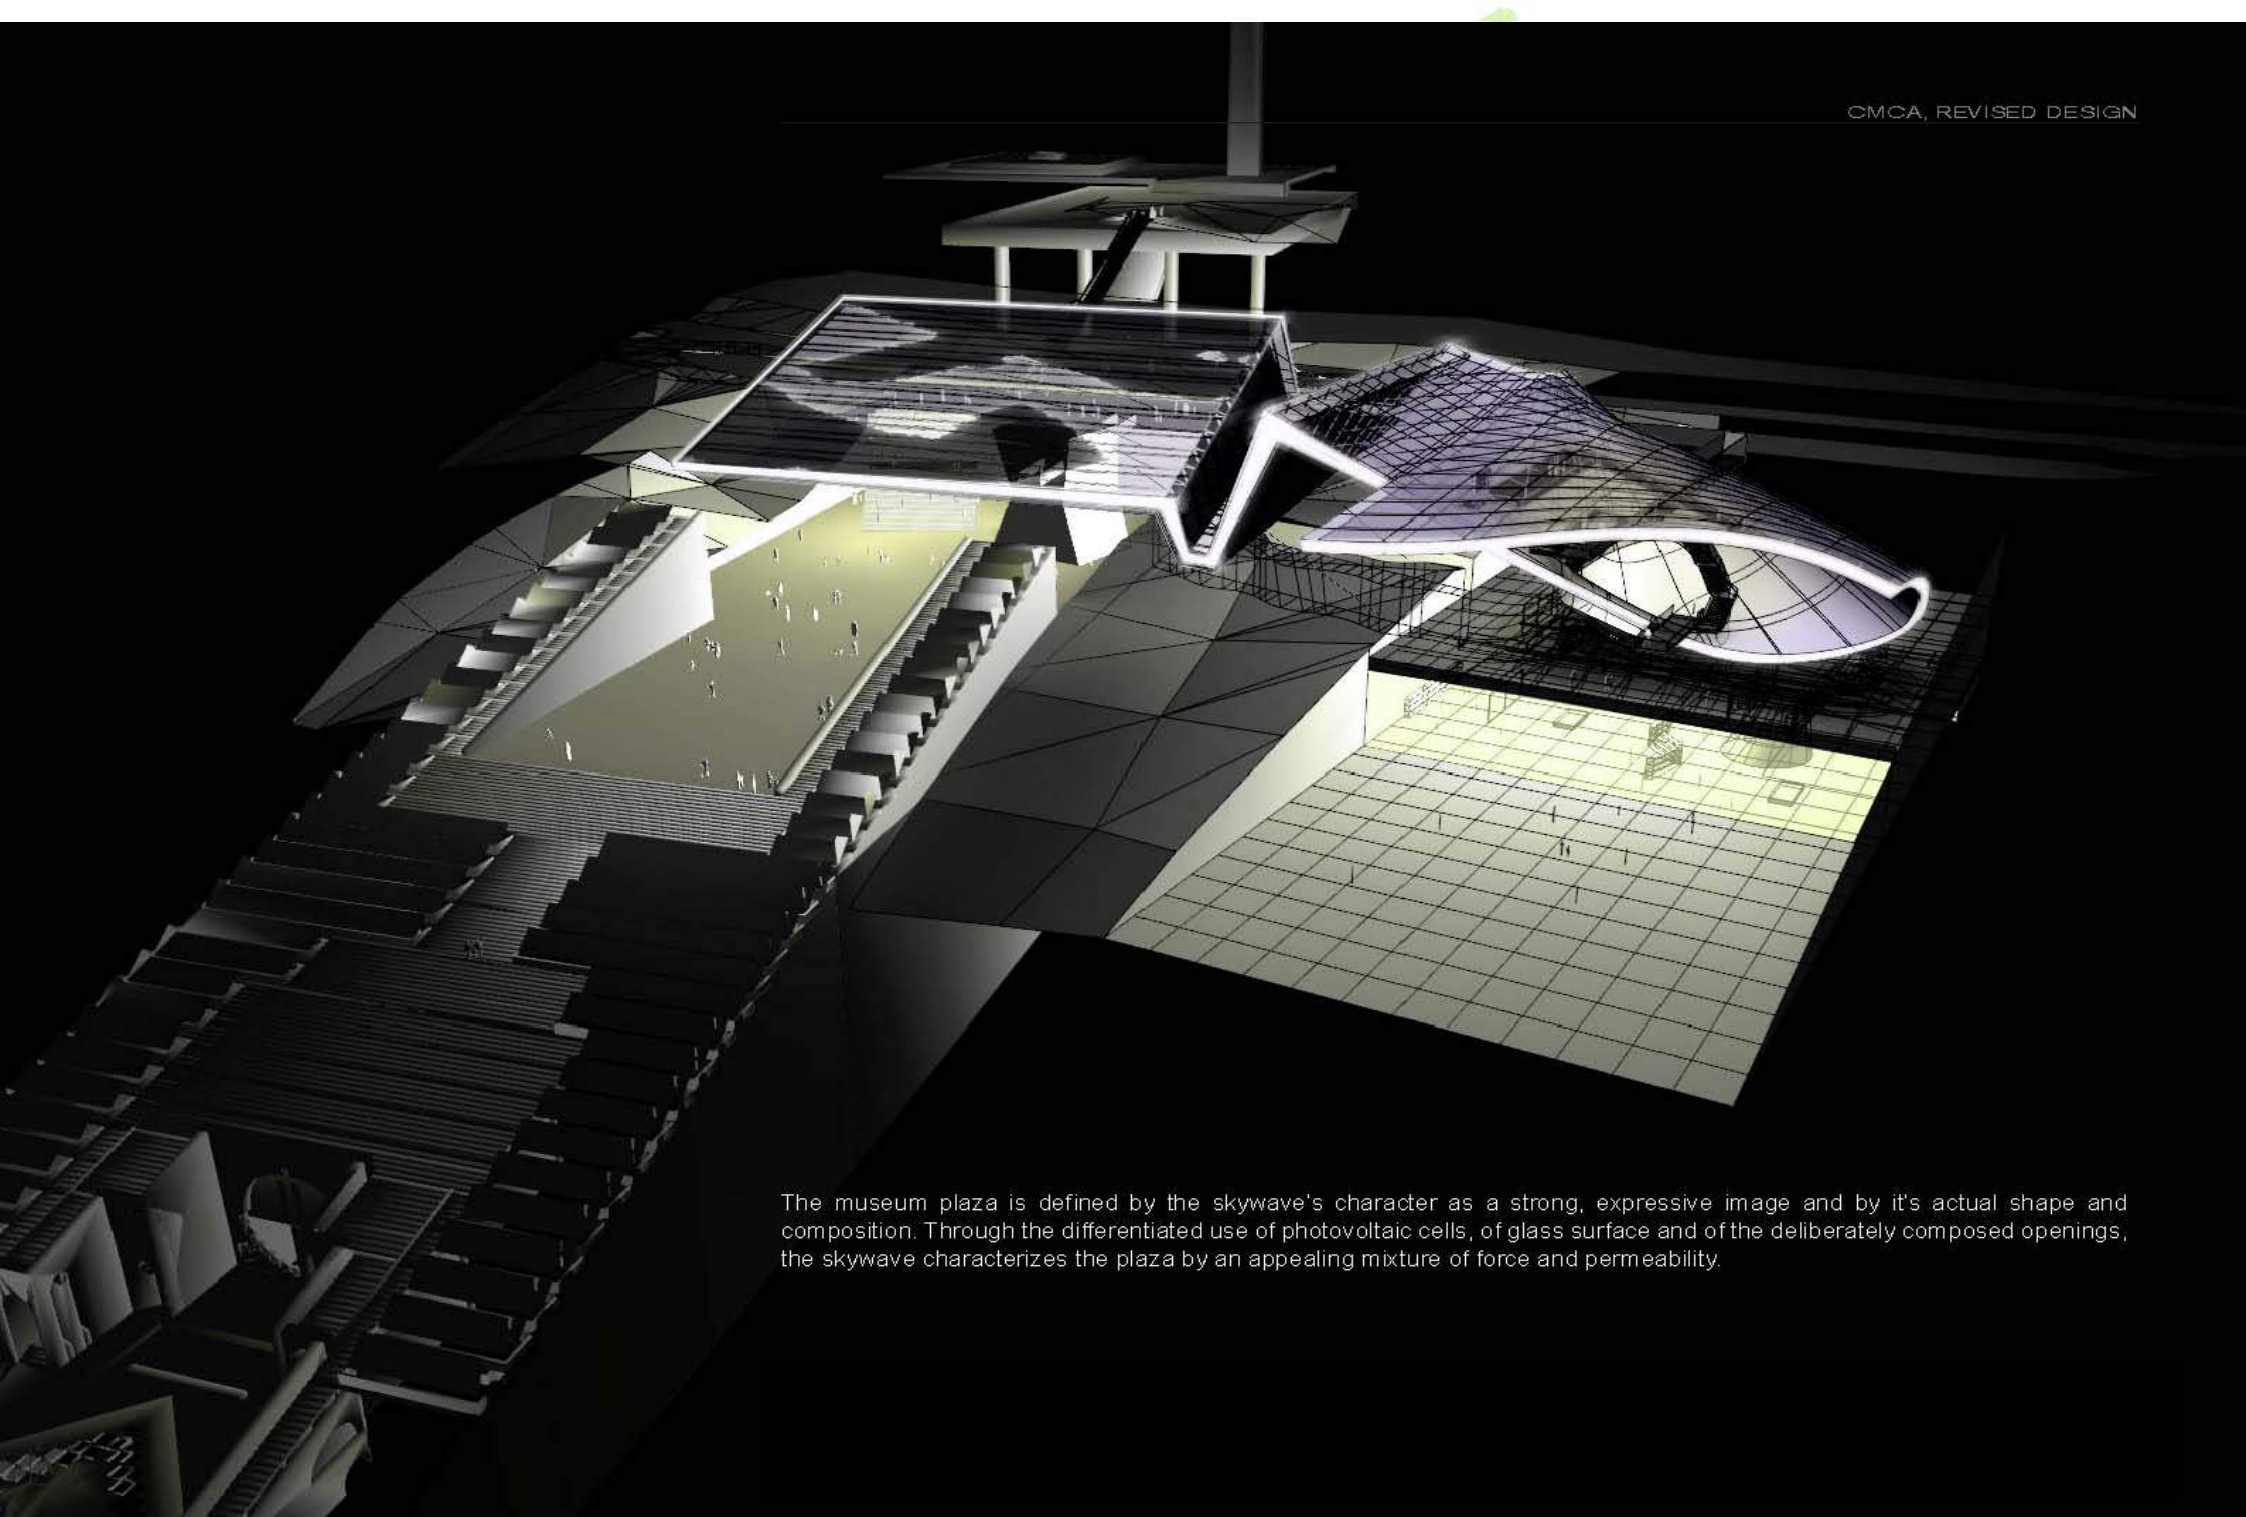

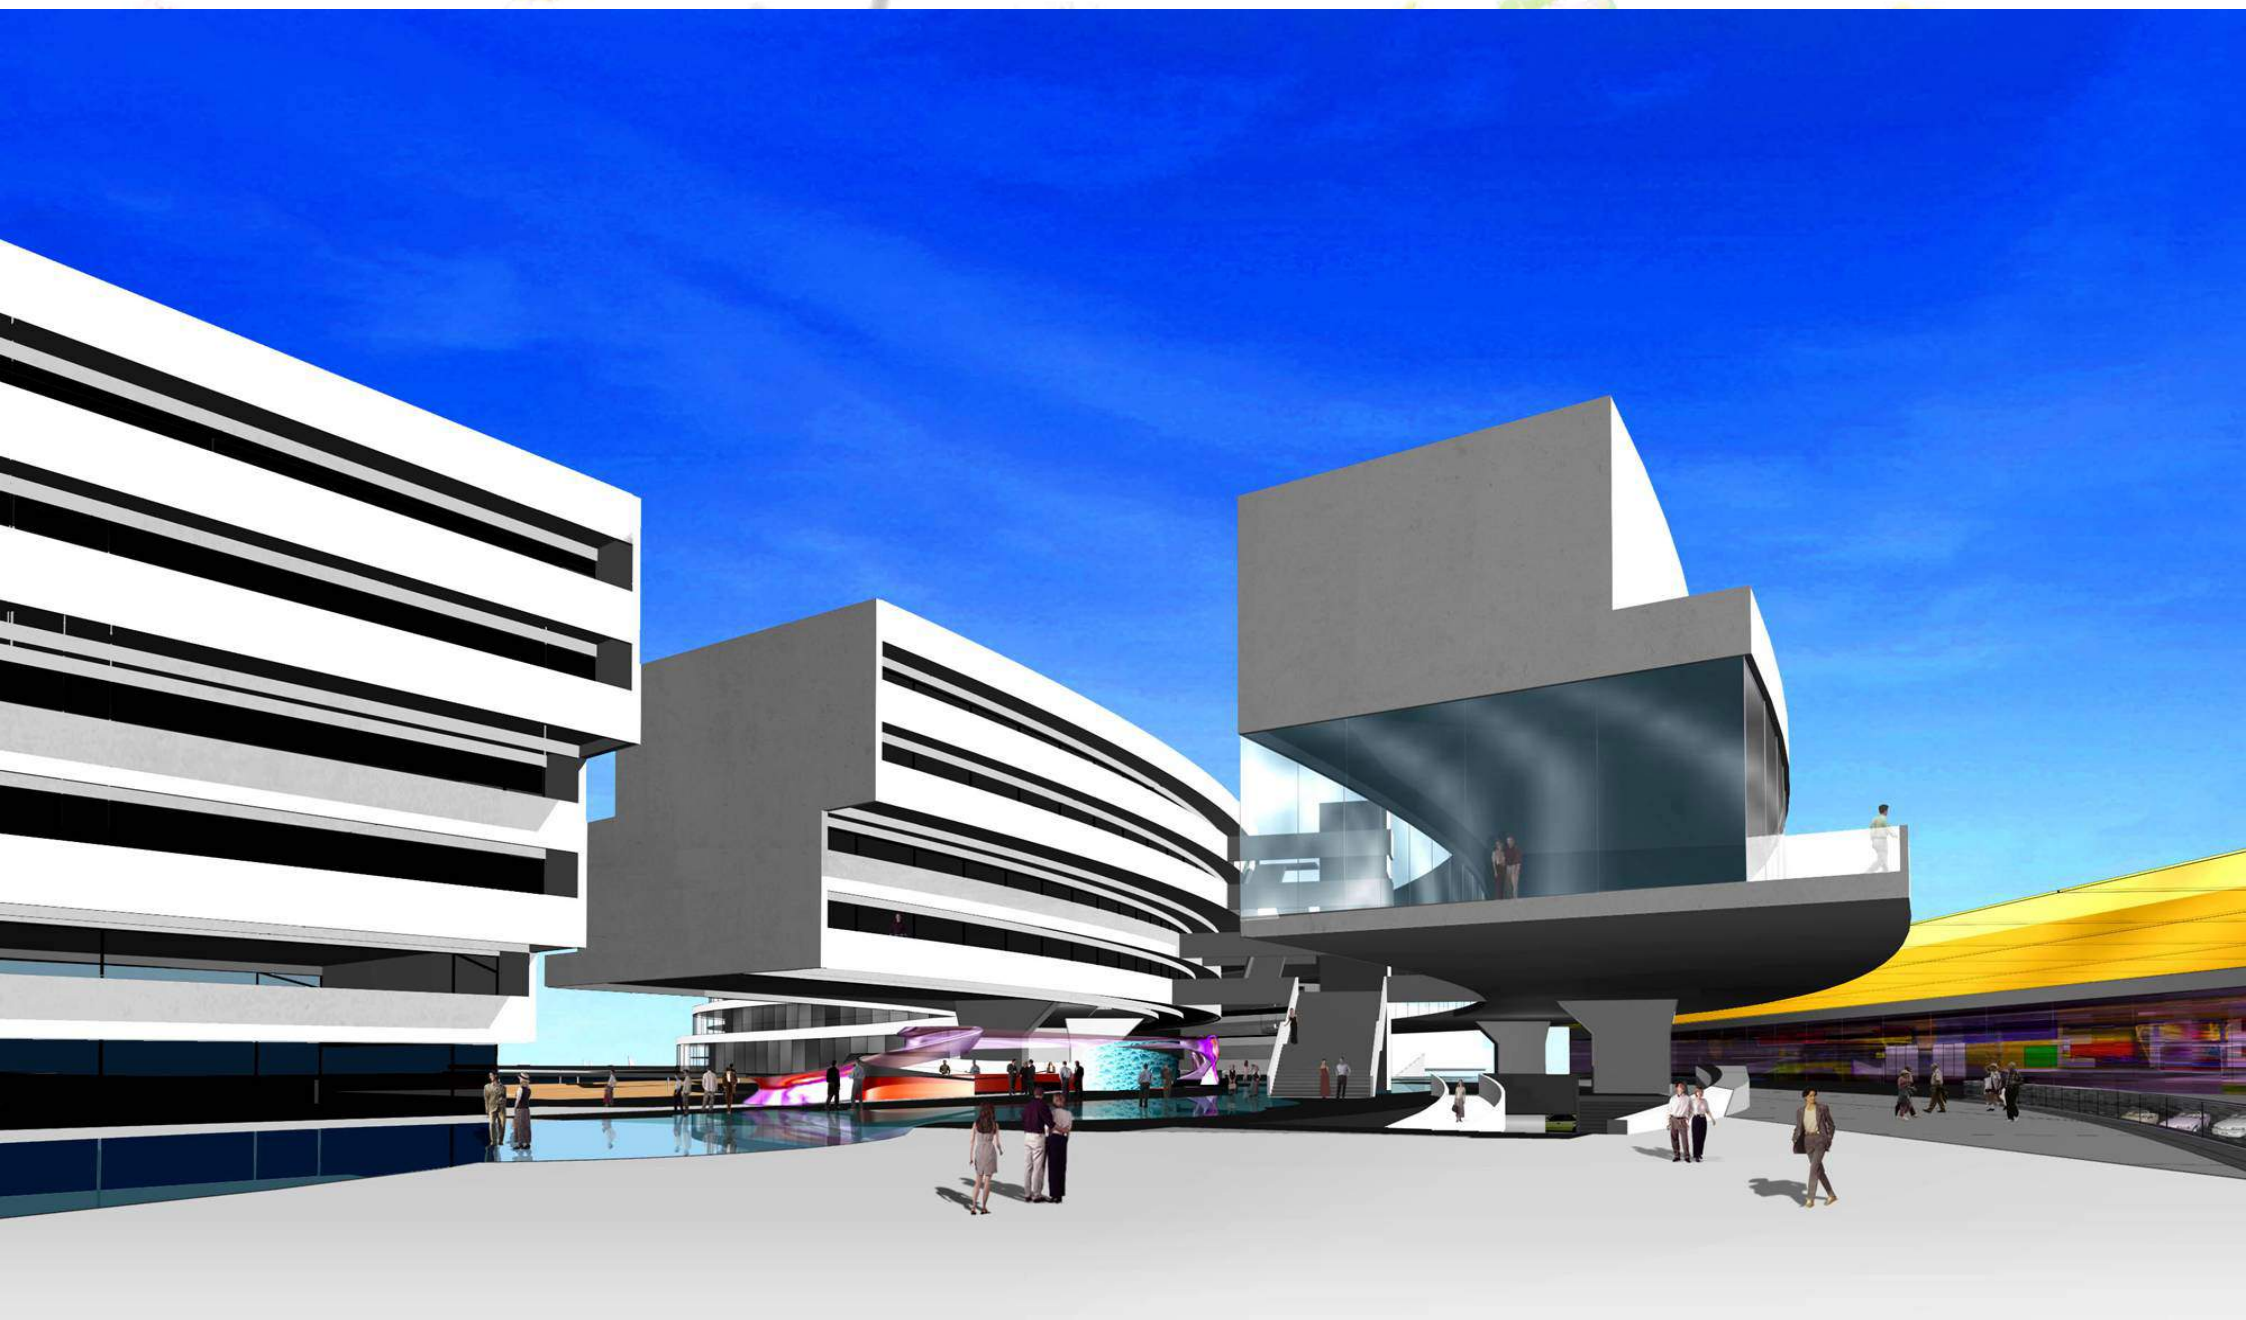

BO STJERNE THOMSEN – ARKITEKTUR & DESIGN - 2006

The museum plaza is defined by the skywave's character as a strong, expressive image and by its actual shape and composition. Through the differentiated use of photovoltaic cells, of glass surface and of the deliberately composed openings, the skywave characterizes the plaza by an appealing mixture of force and permeability.
